

## Press Release

---

Copenhagen October 8<sup>th</sup> 2010

### **Via Venture Partners exits Radiocomp to Microelectronics Technology Inc.**

Via Venture Partners (VIA) announces that it has made an exit of its portfolio company Radiocomp to Microelectronics Technology Inc. (MTI) based in Taiwan and in the US.

Radiocomp will be held by MTI as a 100% subsidiary and function as MTI's European headquarter.

Radiocomp is a global pioneer in software and hardware for advanced wireless communications. The company has positioned itself as the world leader in developing and manufacturing of state-of-the-art fully software configurable radio head products for existing and next generation 4G (LTE) mobile and wireless infrastructure networks.

Radiocomp was founded in the northern part of greater Copenhagen in 2006 by current CEO Thomas Nørgaard and Via Venture Partners invested in Radiocomp shortly after (in 2007). After 3 years of focused development of remote radio head products and underlying platforms, Radiocomp has placed itself in the center of the next generation networks with its world class team.

MTI will combine Radiocomp with its existing hardware and software capabilities to further strengthen its position in the global 4G market. With the acquisition of Radiocomp MTI will substantially extend its range of core technologies for the development of fourth generation mobile communications technology and Long Term Evolution (LTE) related products. The acquisition will further establish a unique position for MTI within the European markets.

### **About Via Venture Partners**

Via Venture Partners is a leading Nordic fund that invests in Nordic software and communication companies with international growth potential. The fund manages EUR 134 million in its first fund provided by ATP, Denmark's largest pension fund. Via Venture Partners has 14 portfolio companies throughout Denmark, Sweden, Norway and Finland.
