## VIA equity sells Triarca to Accent Equity

VIA equity announces today that they have sold Triarca to Accent Equity.

With a history dating back to 1959 and over 1.5 million enclosures sold, Triarca is today one of the leading Scandinavian suppliers of enclosures for infrastructure solutions. The company has unique experience and a solid track-record of producing and distributing high-quality enclosures, used in power distribution, communication technology and e-commerce parcel lockers. Triarca's strong market position is a result of its ability to develop and offer a variety of enclosures in aluminium, galvanized and stainless steel with colour and finish flexibility combined with user-friendly features for installation and maintenance. The customer base primarily consists of blue-chip utility companies and technology companies, and almost all Triarca's enclosures are developed in close co-operation with the customers.

"We have been very pleased with our investment in Triarca. It is a very well-run company with a vision and mission to contribute to the global electrification agenda. This has been a central part of the success that Triarca has experienced, along with its capable management and very competent employees. We are pleased that Triarca is now continuing its impressive journey with Accent Equity", says Peter Thorlund Haahr, partner at VIA equity.

Lars Prisak, CEO of Triarca, is looking forward to the new ownership: "Triarca is prepared for growth and with our focus on digitization and electrification we see good possibilities within sustainable energy, for instance in e-mobility infrastructure. With Accent Equity as majority owner, we will be able expand to new markets and we are excited about exploring opportunities in growing segments such as 5G, car charging stations and e-commerce."

"We are impressed by Triarca's high-quality products, long-term customer relationships and are enthusiastic about the company's growth plans that include geographical expansion and development of the offering for e-commerce parcel lockers as well as new applications aimed to support the increasing need for electrification of societies. The management team is very knowledgeable and competent, and we are looking forward to work together to accelerate growth." says Benny Zakrisson, Partner at Accent Equity

### **About Triarca:**

Triarca is one of the leading Scandinavian suppliers of high-quality outdoor enclosures used primarily in power distribution, communication technology and e-commerce parcel lockers. Headquartered in Hornsyld, Denmark, Triarca employs approximately 80 people and operates a 13,000 sqm highly modern and automated production facility. The company is represented by own sales staff in Denmark, Sweden and Germany.
